Non-Presence of REACH SVHS

Subject: REACH SVHC Substances

As you may know, Metrologic Instruments Inc. and Hand Held Products Inc., both wholly owned subsidiaries of Honeywell International Inc., ("Honeywell") sell products in several countries around the world. The European REACH Regulation 1907/2006 on Registration, Evaluation, Authorization, and Restriction of Chemicals. (REACH) entered into force on June 1, 2007. The candidate list according to Article 59 of REACH was published on 28th of October 2008. , and affects all companies producing, importing, using, or placing products on the European market. It is Honeywell's understanding that the aim of the REACH regulation is to ensure a high level of protection of human health and the environment from chemical substances. As part of Honeywell's ongoing compliance commitment, it has completed a process to identify which, if any, substances of very high concern (SVHCs), (meeting the criteria set out in Article 57 of REACH and included on the REACH "Candidate List" for further regulation), are contained within the product it supplies to you and in what concentrations. This communication refers to the latest version of the ECHA Candidate List at the time the product was shipped. As part of this SVHC identification process Honeywell has:

- reviewed internal/publicly available engineering data in relation to the presence of SVHCs in Honeywell's products or any of their component parts;
- reviewed available safety data sheets for input materials;
- Communicated with suppliers to exclude/confirm the presence of SVHCs in component parts of Honeywell products.

As a result of this process, Honeywell confirms that, to the best of its knowledge, the product it currently supplies to you does not contain any SVHCs included on the Candidate List in concentrations above 0.1 % (w/w).

Very truly yours,

John Gardner
